## **Information Sheet**

### **COURSE DESCRIPTION:**

Rescue Systems classes is a program that was developed by the California Office of Emergency Services in conjunction with the National Fire Academy. Rescue Systems classes is an intensive 6-day program that includes hands-on techniques that emphasize what is covered in the classroom.

Day 6 of the program will include a structural collapse scenario that entails breaking and breaching concrete, lifting and rigging, technical search techniques, emergency building shores, rope rescue, and scene management.

This program will be taught by instructors who are experts in their respective areas and are also members of the Beverly, Massachusetts-based FEMA USAR Team MATF-01. You will not want to miss this program as it is one of the most challenging held at the New Hampshire Fire Academy.

Lunch will be served daily and is included in the tuition cost. Students are on their own for breakfast and dinner daily.

Students must be present throughout the entire program to be eligible for certificates of completion from the National Fire Academy and the New Hampshire Fire Academy.
